SEAN LEE

Quality Engineer | AS9100 Aerospace & Semiconductor Manufacturing
Austin, TX | seanlee901@gmail.com | www.linkedin.com/in/sean-lee-bbb8ab230

SUMMARY

Quality Engineer with 5+ years in AS9100/ISO 9001 aerospace and semiconductor manufacturing, advancing from CMM inspection to leading internal audits, 8D corrective actions, NPI quality planning, and customer engineering changes. Led a 1Factory rollout that cut quality processing time 75% for 200 users, leads a team of 4 technicians, and has trained 100+ employees, cutting operator-caused nonconformances 50%. Mentor for high school internship programs. Pursuing a B.S. in Electrical and Computer Engineering.

EXPERIENCE

Quality Engineer January 2025 – Present
Athena Manufacturing | Austin, TX

- Led transition to 1Factory quality software, reducing quality processing time by 75% across 2,000+ part numbers and 200 users.
- Directed a team of 4 Quality Engineering Technicians to create 2,000+ inspection plans for aerospace and semiconductor components.
- Drove quality planning for 500+ new parts through new product introduction (NPI), reviewing customer-specific requirements and specifications and flowing them down into inspection plans, work instructions, and production controls.
- Managed 50+ Engineering Change Requests per year as primary liaison between production and customers, maintaining 100% on-time closure.
- Led internal audits supporting successful ISO 9001/AS9100 recertification with zero major findings.
- Led 30+ 8D corrective actions on customer and internal nonconformances, reducing repeat defects.

Quality Technician I – III May 2021 – January 2025
Athena Manufacturing | Austin, TX | Promoted twice, Technician I → III

- Programmed and operated Mitutoyo Crysta-Apex CMM using CMM-Manager for high-precision aerospace and semiconductor components.
- Built AS9102 First Article Inspection packages for 15+ customers across the aerospace, semiconductor, and other industries.
- Developed inspection plans for products ranging from high-precision machined components (tolerances to ±0.0002") to large integrated weldment frames.
- Performed detailed inspections to verify conformance to customer requirements and industry standards.

TRAINING & MENTORSHIP

- Developed and delivered training sessions to 100+ employees on blueprint reading, GD&T, inspection methods, and QMS procedures, reducing operator-caused nonconformances by 50%.
- Mentor 15 high school interns per year through two internship programs with local schools, teaching measurement, inspection, and quality fundamentals.

SKILLS

Standards: AS9100, ISO 9001, AS9102 First Article Inspection, PPAP, APQP, customer-specific requirements (CSRs)

Methods: NPI quality planning, 8D corrective action, root cause analysis, SPC, FMEA, control plans, GD&T, internal auditing, SOP development

Tools: Mitutoyo CMM / CMM-Manager, SolidWorks, 1Factory and HighQA quality software, C++, Excel

Leadership: Team leadership, technical training, mentoring, customer communication, engineering change management

EDUCATION

B.S. Electrical and Computer Engineering (in progress) Expected January 2028
National University | San Diego, CA

CERTIFICATIONS

OSHA 30 | GD&T Certificate, Austin Community College
